PROFESSIONAL SUMMARY

Data-driven Information Systems graduate student specializing in AI and machine learning. Proficient in Python, SQL, and R with hands-on experience developing generative AI solutions, building predictive models, and deriving actionable insights from complex datasets. A collaborative problem-solver eager to apply advanced analytical skills to solve real-world business challenges.

EDUCATION

Saint Louis University, School of Professional Studies, St. Louis, Missouri

MS, Information Systems, May 2026 (anticipated) *GPA: 4.0*

Activities: Member of Alpha Sigma Nu, an honorary society that recognizes students who distinguish themselves in scholarship, loyalty and service and encourages its members to a lifetime pursuit of intellectual development, deepening Ignatian spirituality, service to others, and a commitment to the core principles of Jesuit education.

Pragati Engineering College, Surampalem, Andhra Pradesh, India

BS, Computer Science and Engineering, June 2024 *GPA: 7.9/10*

Activities: Moderator for the sophomore and Junior year. Worked closely to establish clubs in the college and actively recruit people to run the clubs and inspire students to pursue their career in technical fields. Club Coordinator for the junior year, maintained the established Industry 4.0 clubs. Appreciated by the director for my outstanding efforts in establishing clubs.

WORK EXPERIENCE

CoreCard, Norcross, Georgia

Summer Intern *May 2025 – July 2025*

- Built an in-house AI chat application for company employees using **Large Language Models (LLMs)** and created a custom **Model Context Protocol (MCP)** to connect it to a **Python backend**.
- Contributed to modernizing the company's product by developing a new front-end using **React** and **TypeScript**.
- Developed a Python script leveraging **Regex** and **sqlparse** to obfuscate proprietary source code, generating high-fidelity **datasets** used to train an AI-automated database migration system.
- Created **documentation** for legacy APIs and their data flows where none existed before, providing a clear guide for developers to build services on the new system.

Techsophy Solutions Pvt. Ltd., Hyderabad, India

Software Intern May 2023 – July 2023

- Developed “Sequredge”, a project that uses **machine vision** and AI to detect cars entering a community, enhancing the security of gated communities and apartments.
- Improved the accuracy of the object detection of the machine vision model by employing the **YOLO V5 object detection model**.

PROJECTS

ML Model to Find Salary Using Experience

- Built a simple linear regression model to predict salary using an individual's experience.
- Provided descriptive data summaries and conducted preliminary data analysis to validate model inputs.
- Created the model using only NumPy and Matplotlib, achieving an R2 score of approximately 0.99.

Web-Crawling and Data Cleaning using Python

- Developed a personal project to perform web-crawling and data retrieval from websites using Python.
- Utilized libraries like BeautifulSoup to crawl websites and performed data maintenance, reshaping, cleaning, and validation.
- Presented the cleaned data in a CSV file, focusing on information regarding various allergies for further analysis.

SKILLS

- **Data Analysis & Visualization:** Data Visualization, Power BI, Data Analysis, ETL processes, Data Engineering, Microsoft Excel
- **Statistical Software & ML:** Python, R, SQL, SQL Server, Machine Learning, Computer Vision, NLP, Neural Networks, Databases
- **Programming & Tools:** React, TypeScript, Git, GitHub, Bash, LLMs

CERTIFICATIONS

- Python data structures - University of Michigan (Coursera)
- Accessing Web Data using python - University of Michigan (Coursera)
- Using Databases with Python - University of Michigan (Coursera)
- Supervised Machine Learning - Stanford University and DeepLearning AI (Coursera)
- Advanced Learning Algorithms - Stanford University and DeepLearning AI (Coursera)
